

This book does more than teach you how to solve the problem. It teaches you how to see the problem, how to recognize and avoid the traps, and how to think! Even if you hate geometry, have nightmares about algebraic equations, and can't stand the sight of a percent sign, this book will turn you into a fearless giant-killer. Using SAT-style questions to demonstrate one hundred critical concepts, it delivers plenty of straight talk, solid information, humor, crystal-clear diagrams, cartoons, teaching boxes, a very complete glossary, and lots more! Remember: there's math, and there's SAT math. A great score comes from knowing the difference. And if you don't understand that, you need this book! (120 pages)

Joy Of Boogie & Blues, The Best American Science and Nature Writing 2002 (Best American (TM)), Puzzle Paragraphs: Taking the Mystery Out of Writing Nonfiction, Swan Lake Hyo memoire 2006+ (Japanese Edition), Legendary Hunts II: More Short Stories from the Boone and Crockett Awards, The Law Firm and the Public Good, Israels Watchman (And Prophetic Expositor) [Afterw.] the Prophetic News and Israels Watchman, Ed. by A.
